A FEW GOOD WORDS

From a Valued VBPFUCU Member

"I have been a VBPFUCU member for a while and initially thought they were a decent bank. However, recently, I realized that they are so much more than just my credit union. When my husband and I were in the process of purchasing a new vehicle the credit union was there for us every step of the way. In addition, they were careful to provide us with tools to improve our credit and expand our finances. We could not be blessed with a better credit union and they consider us family and people rather than numbers, credit scores, or spreadsheets. I would highly recommend them and look forward to doing more business with them in the future."

SAVING STRATEGIES FOR HIGH PUMP PRICES

Gas prices have been on the rise. How can you save gas and money? Here are a few tips:

- **Avoid buying premium.** Regular gas will do. Check your Owner's Manual to be sure.
- **Avoid driving erratically.** Quick starts and not coming to a gradual stop waste gas.
- **Pay attention to local traffic reports** or use an app to help you avoid sitting in long lines of traffic.
- **Lighten your load.** Remove any unnecessary objects from your trunk or vehicle. Extra weight decreases your fuel economy.
- **Watch your speed!** You will get better fuel economy at 55 MPH versus 65 or 70 MPH. Use cruise control when possible.
- **Check your tire pressure.** Under-inflated tires can cut fuel efficiency.
- **Keep up regular maintenance of your vehicle** to ensure that your engine is working at peak efficiency.
- **Combine errands or carpool.** Be strategic when planning where your need to go to avoid unnecessary driving.
